

Student Letter

Your first graded assignment as a science student in Mrs. Percy's class is to write a letter about yourself. There is no right or wrong answers... Pretty easy right??? Oh yeah, and it will even be worth a quiz grade!

Here's how it needs to be done :

- Paragraph #1 → Tell me about yourself! You don't have to write your whole life story, but I want to know all about you. How you write this paragraph is up to you. As your teacher, what do you think is important that I know about you?
- Paragraph #2 → Tell me about school! Please answer these questions: Where did you go last year (If ELHS, who was your science teacher?) How do you feel about school? What is your favorite and least favorite subject? How can I help you be successful in my class? What do you think makes a good teacher?
- Paragraph #3 → What do you want to do after high school (what career are you considering)? Why do you think science is important? When would you ever use it in life? Or, if you think science is useless, defend your argument and tell me why. (Of course, you're wrong!) ☺

The ONLY Rules for this letter :

- You must have 3 paragraphs and answer ALL questions above. Use proper letter format and sign your name at the end so I can read it.
- Your letter should be one (1) page long. It should not be much longer or shorter than 1 page.
- Letters can be hand-written, as long as I can read it.
 - **If you follow ALL of the above rules, you will not lose any points ***
